water rocket design questions

Answer the following questions in complete paragraphs

1) What difficulties did you have during the build process and how did you overcome them?

2) How did your design change as you progressed through the build process?

3) How long was your rocket in the air? (estimate if you need to) How did this compare to the designs of the other students? Describe the best design that you observed.

4) What was the most interesting part of this activity?

5) What did you learn from this activity? How might you apply this new knowledge?

6) If you could redo your design what would you do differently? Explain your answer.
